PROFILE SUMMARY

I am a student in Computer Science Engineering (CSE) with experience in .NET development, specializing in frontend, backend, and database development. Proficient in SQL, C++, and VB.NET, I have a strong foundation in creating efficient and user-friendly applications. With a keen eye for detail and excellent problem-solving skills, in addition to my technical skills, I possess a strong aptitude for problem-solving and a passion for continuous learning. I thrive in a collaborative environment where I can leverage my communication skills to effectively interact with team members, stakeholders, and clients. My ability to adapt to evolving technologies and my dedication to staying updated with the latest industry trends make me a valuable asset to any team.

Bachelor Of Technology Computer Science	Rajiv Gandhi Proudयोगiki Vishwavidayala Bhopal	8.5 cgpa
12 TH	St.joseph's Mission School Bijuri(CBSE)	8 cgpa
10th	St.joseph's Mission School Bijuri(CBSE)	85%

INDUSTRIAL TRAINING

Sparrow Software Pvt Ltd Dot Net Developer

30/12/2022 - 4/04/2023

As a .NET developer with a focus on images, crystal reports, and forums, I have extensive experience in developing software applications that incorporate these features. I am highly skilled in using .NET

frameworks such as ASP.NET, VB.NET and have a strong understanding of object-oriented programming principles. In terms of image processing, I have worked on various projects involving image resizing, cropping. When it comes to crystal reports, I am proficient in designing, creating, and modifying complex reports that include charts, graphs, and sub reports .

CipherByte Technologies

22/08/2023-23/09/2023

C++ Developer Internship where I made some projects like Railway Reservation system, Digital Clock Time, Got some basic experience in c++ projects.

Bhumi COVID Vaccination Influencer

02/03/2021 - 02/05/2021

In influential community members became "listening posts" for community concerns about COVID-19 measures and vaccination. They spread reliable information and fed back any doubts or confusion to central health authorities. These micro-influencers are embedded across society, meaning even hard to-reach communities have a trusted person with whom to discuss their questions or concerns.

PROJECTS

* Hospital Forum in VB.NET

Completed a pure registration hospital Forum using all the basic and advanced tools in the toolbox like image box, grid, panel, crystal report.

* Car Purchase in VB.NET

Forum where one can search, edit, delete, insert all the different types of cars and purchase them.

* Railway Reservation System in C++

One can book their tickets, search and edit using C language.

SKILLS

- C++, Data Structures and Algorithms
- Javascript, React.js
- Dot.Net, SQL Server
- GitHub, UI Design
- HTML, CSS, JavaScript, Bootstrap
- Object Oriented Programming
- Software development lifecycle
